Duty on payments for artistic/journalistic work/ services

Catalogue of Artists and Rate of Charge

1 Catalogue of artists

An **Artist**, according to the National Insurance Act for Artists and Writers (KSVG), is a person who is creating, performing or teaching art in the sectors music, performing or visual art. Designers as well as teachers/ trainers in the sector design also fall under this category.

A **Writer/ Journalist**, according to the KSVG, is a person who is working as a writer, journalist or publicist or who is teaching in the sector journalism.

The KSVG does not contain a more detailed definition in its statement of grounds appertaining the draft law (BT- printed matter 9/26, Page 18). " We have abstained from giving more detailed job definitions regarding artistic/ journalistic work in form of a listing ."

A detailed listing of that kind would cause conflict with the diversity, complexity and dynamics of the special nature of artistic and journalistic occupation.

Deejay *).....
Designer.....

Nevertheless it is assumed, that those occupational groups recorded/ registered in the so-called "Künstlerbericht" (printed matter 7/3071, S. 7) as well as all writers and journalists occupied in the sector called "word" are included in this regulation.

We have abstained from a differentiation regarding the quality of artistic and journalistic occupation just as it has been the case with the already insured self-employed artists according to the KSVG. For the social insurance merely the aspect of protection requirement is decisive.

Listed below is a catalogue giving an overview of a few artistic and journalistic occupation groups, covered by the KSVG. It is geared to the practical experience the Künstlersozialkasse has gained by the implementation of the act and it is not at all to be regarded final or static.
